

Frameshift variant expression vs snip count difference

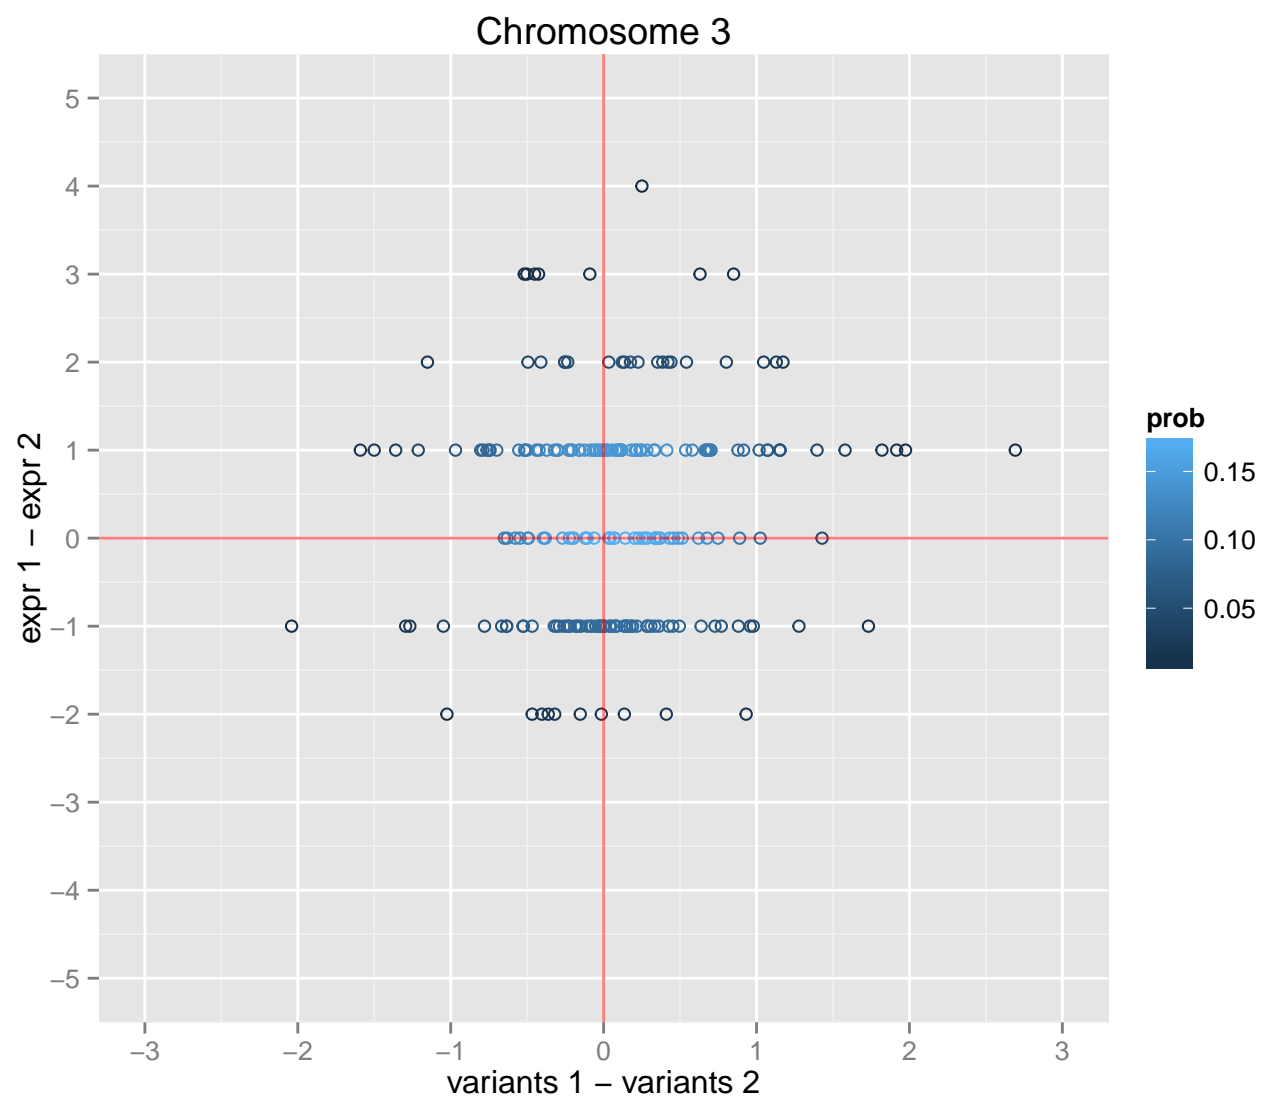

```
## data frame with 0 columns and 0 rows
```

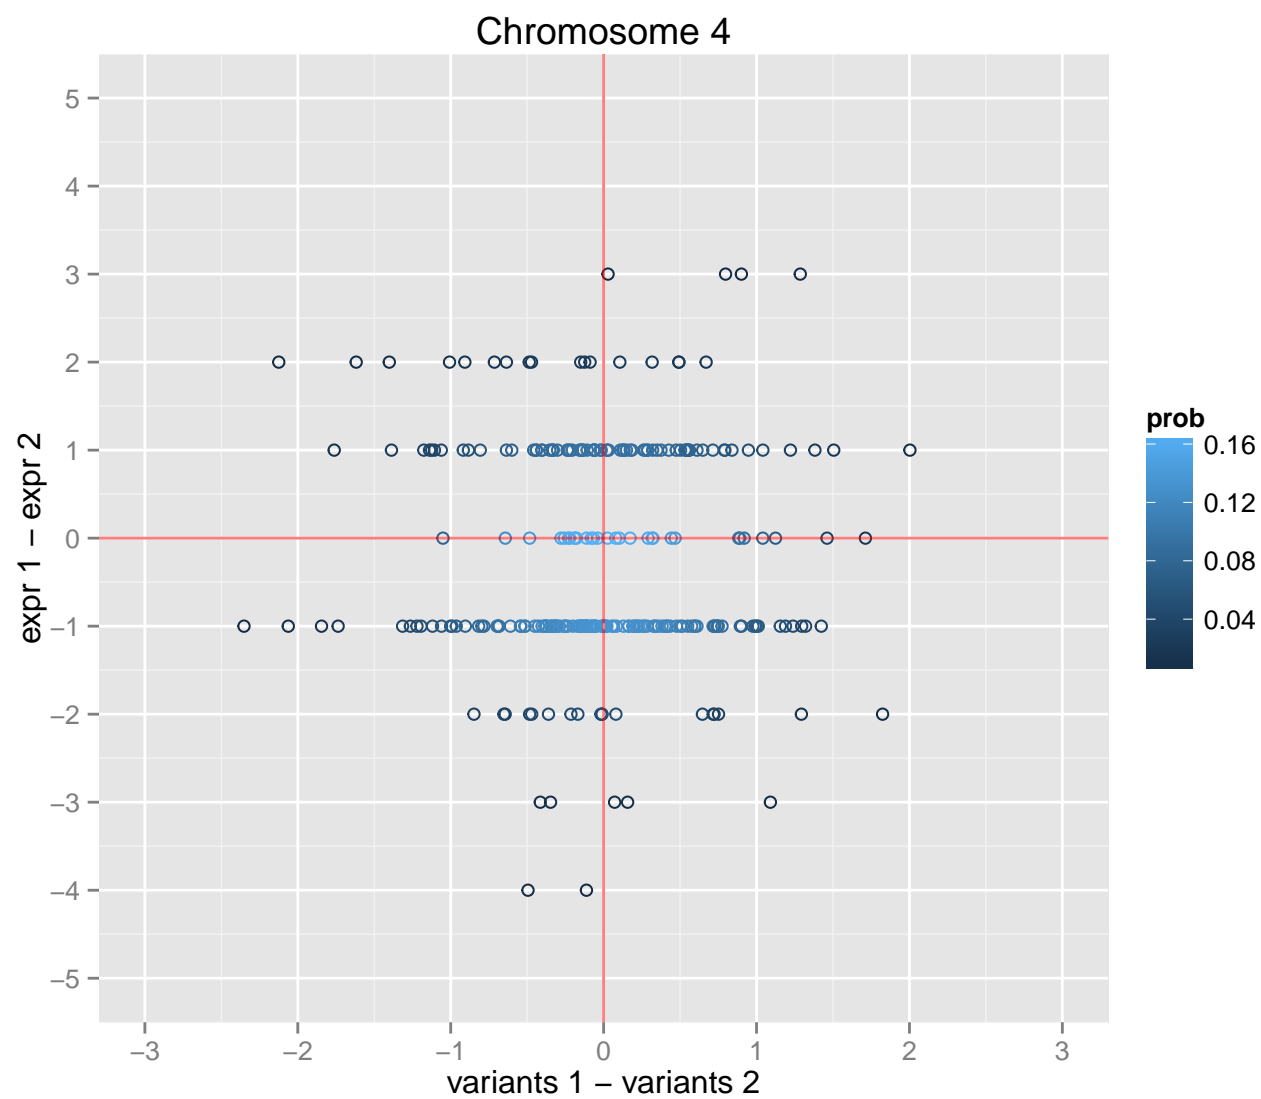

```
## data frame with 0 columns and 0 rows
```

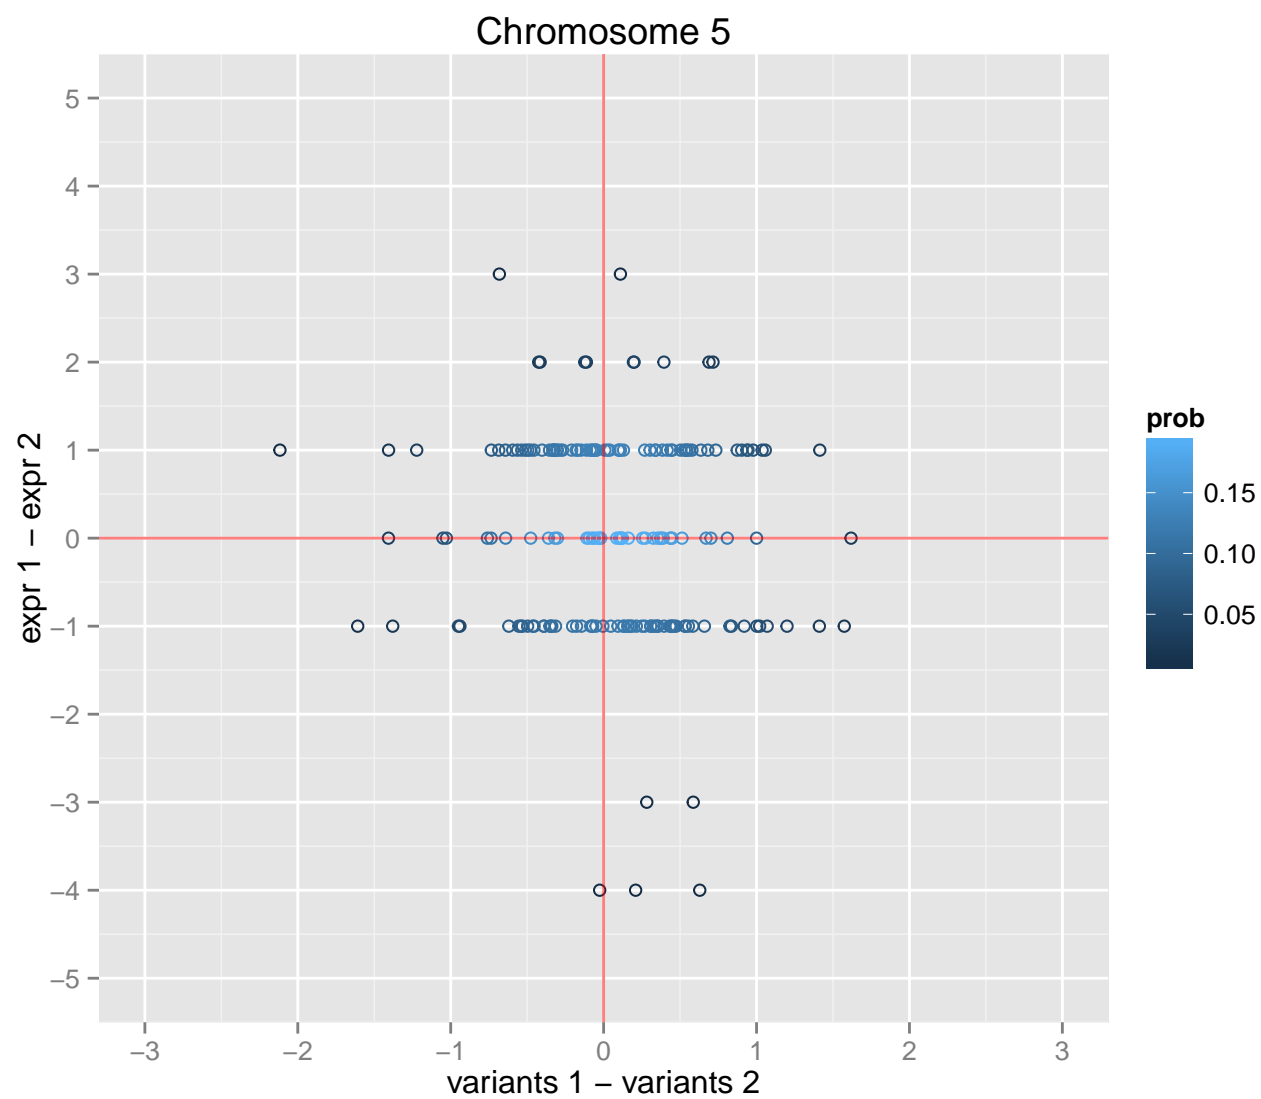

```
## data frame with 0 columns and 0 rows
```

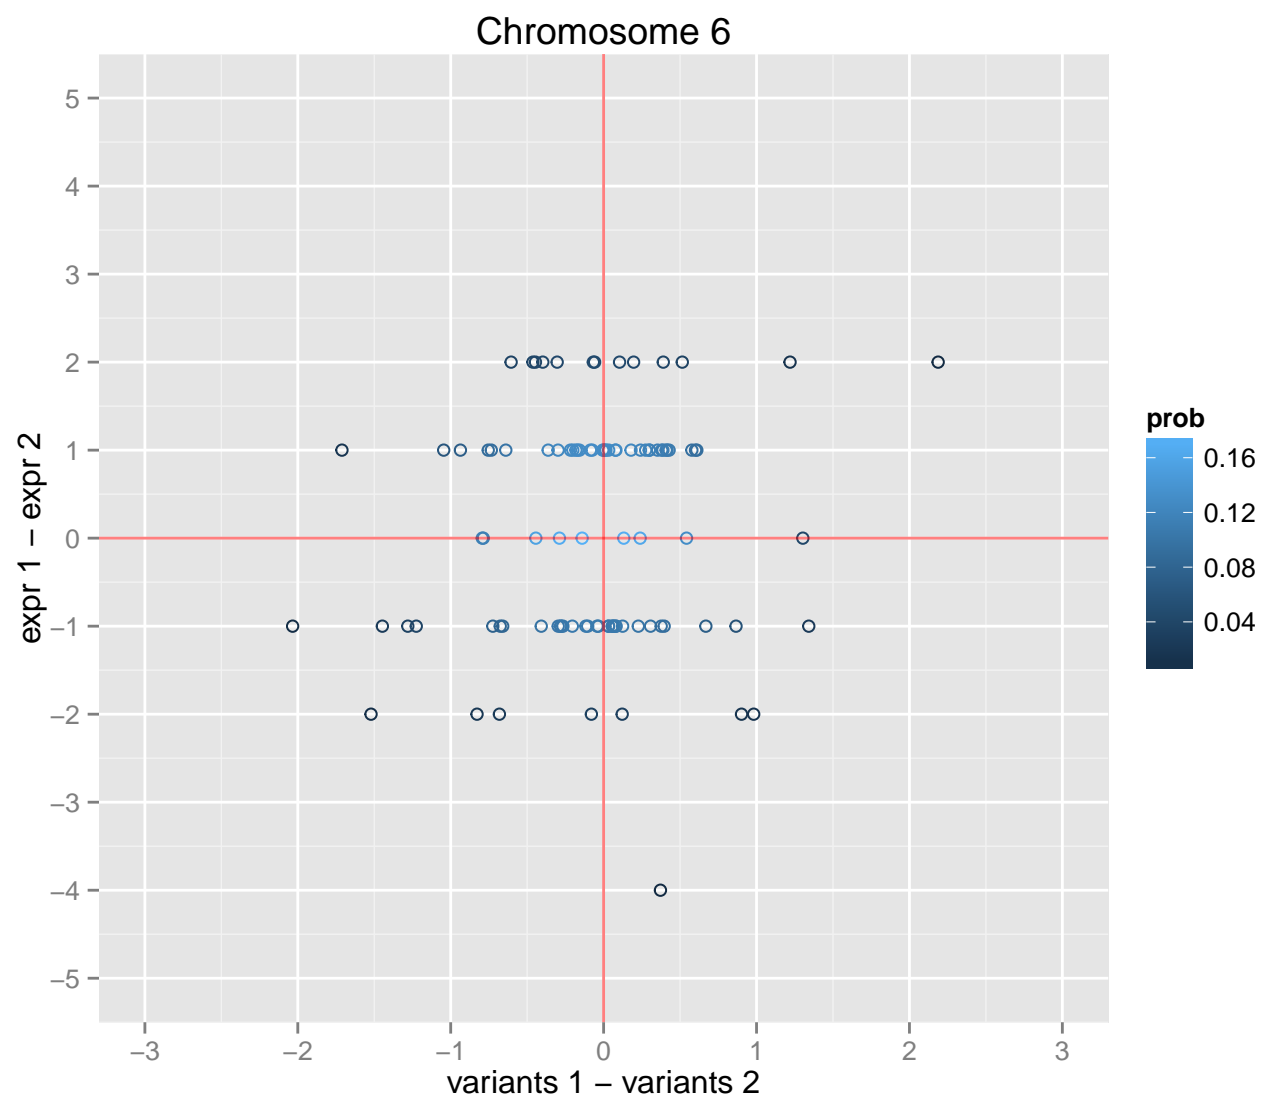

```
## data frame with 0 columns and 0 rows
```

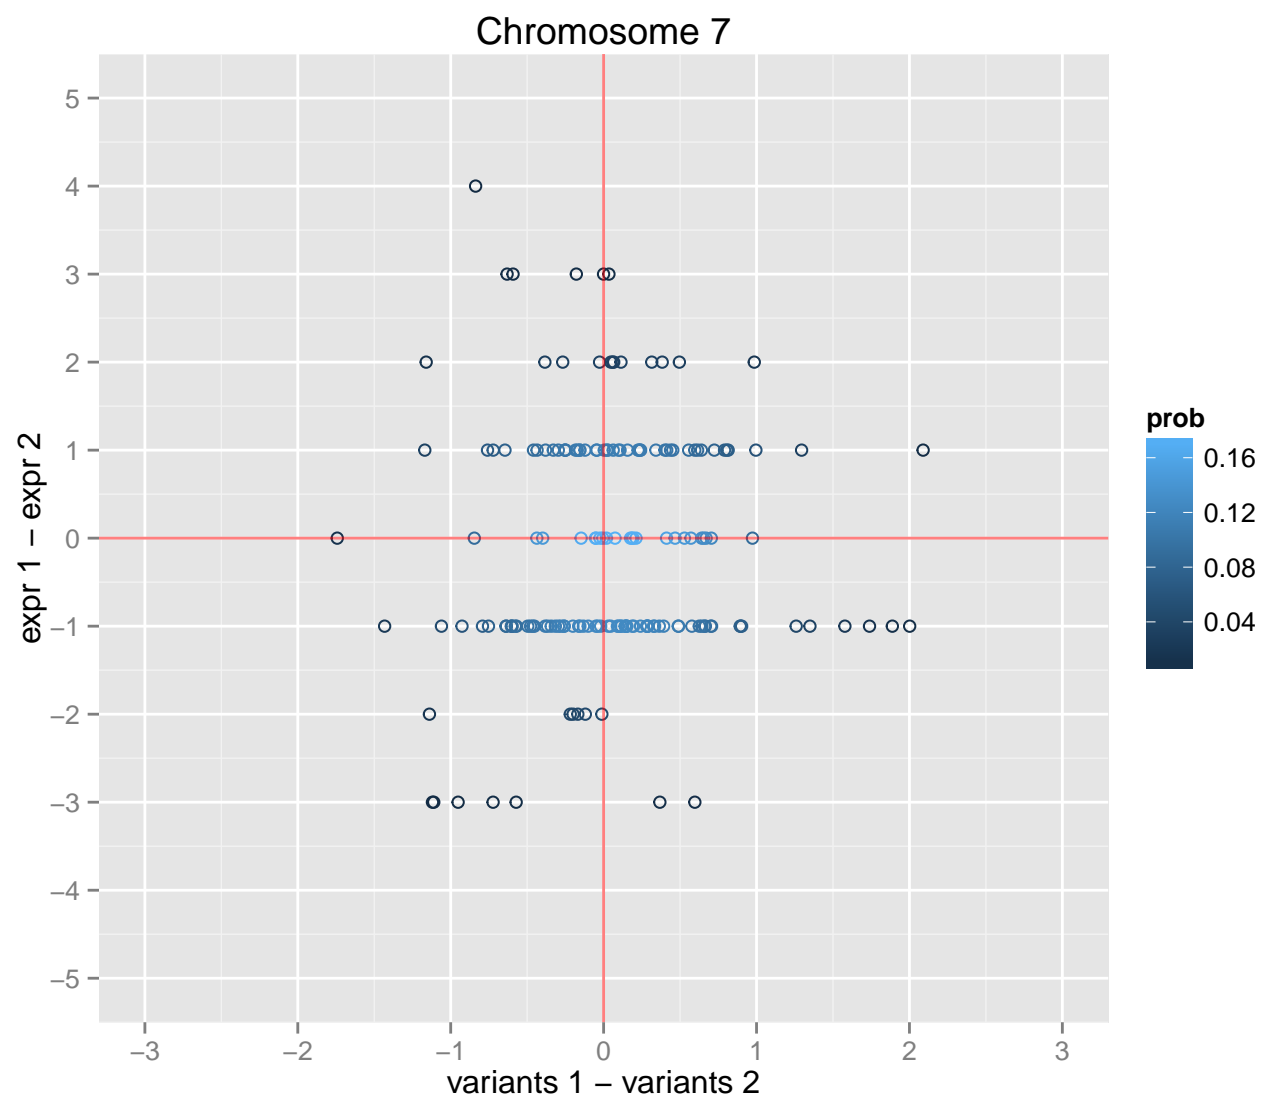

```
## data frame with 0 columns and 0 rows
```

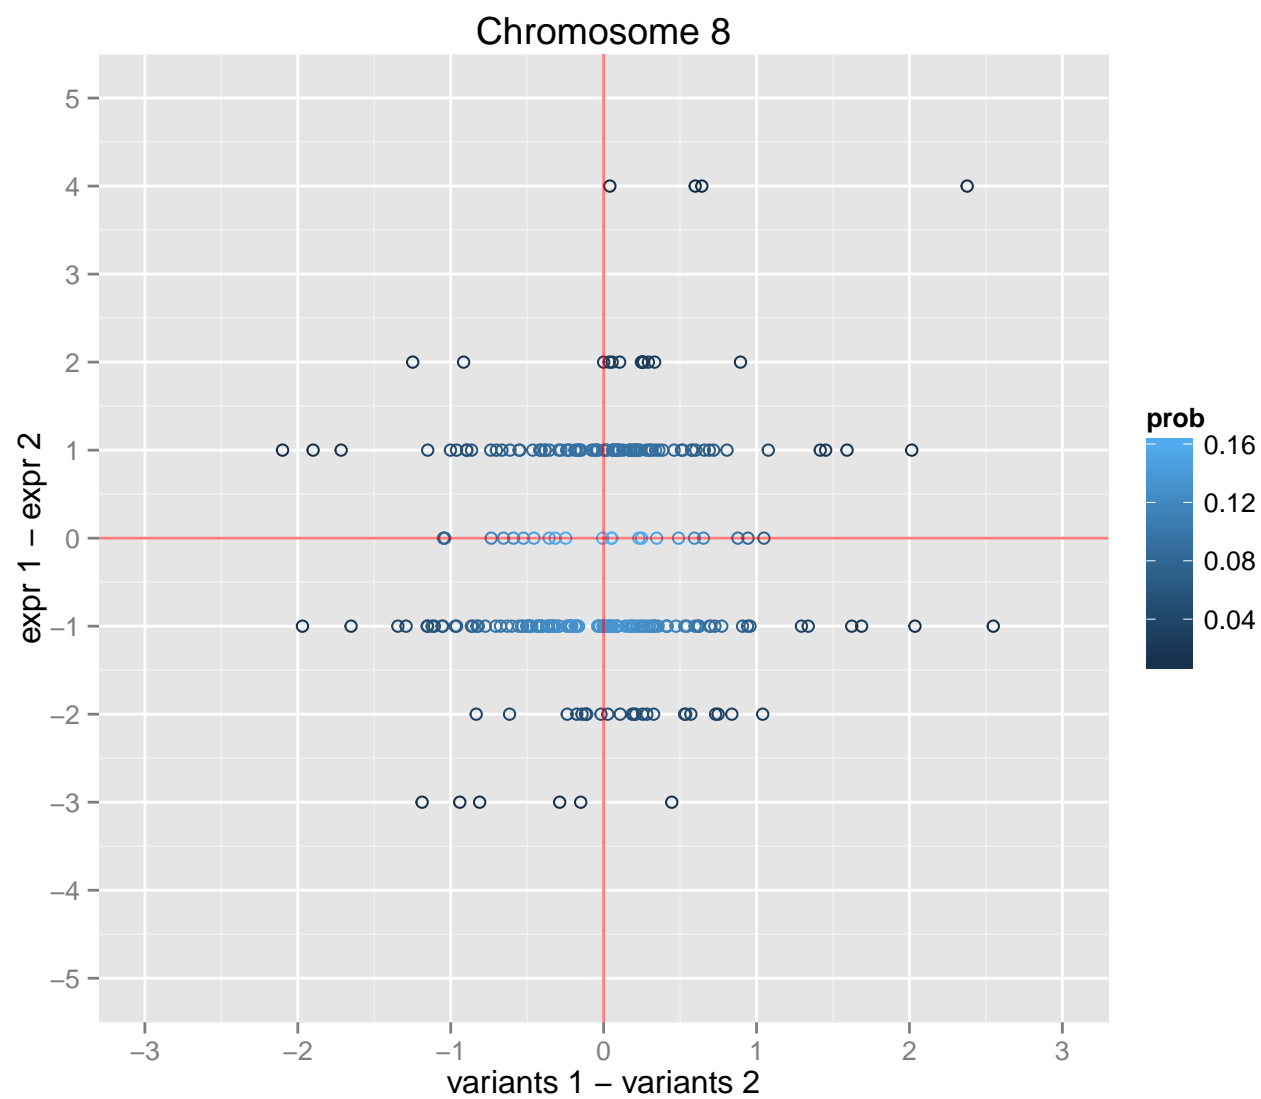

```
## data frame with 0 columns and 0 rows
```

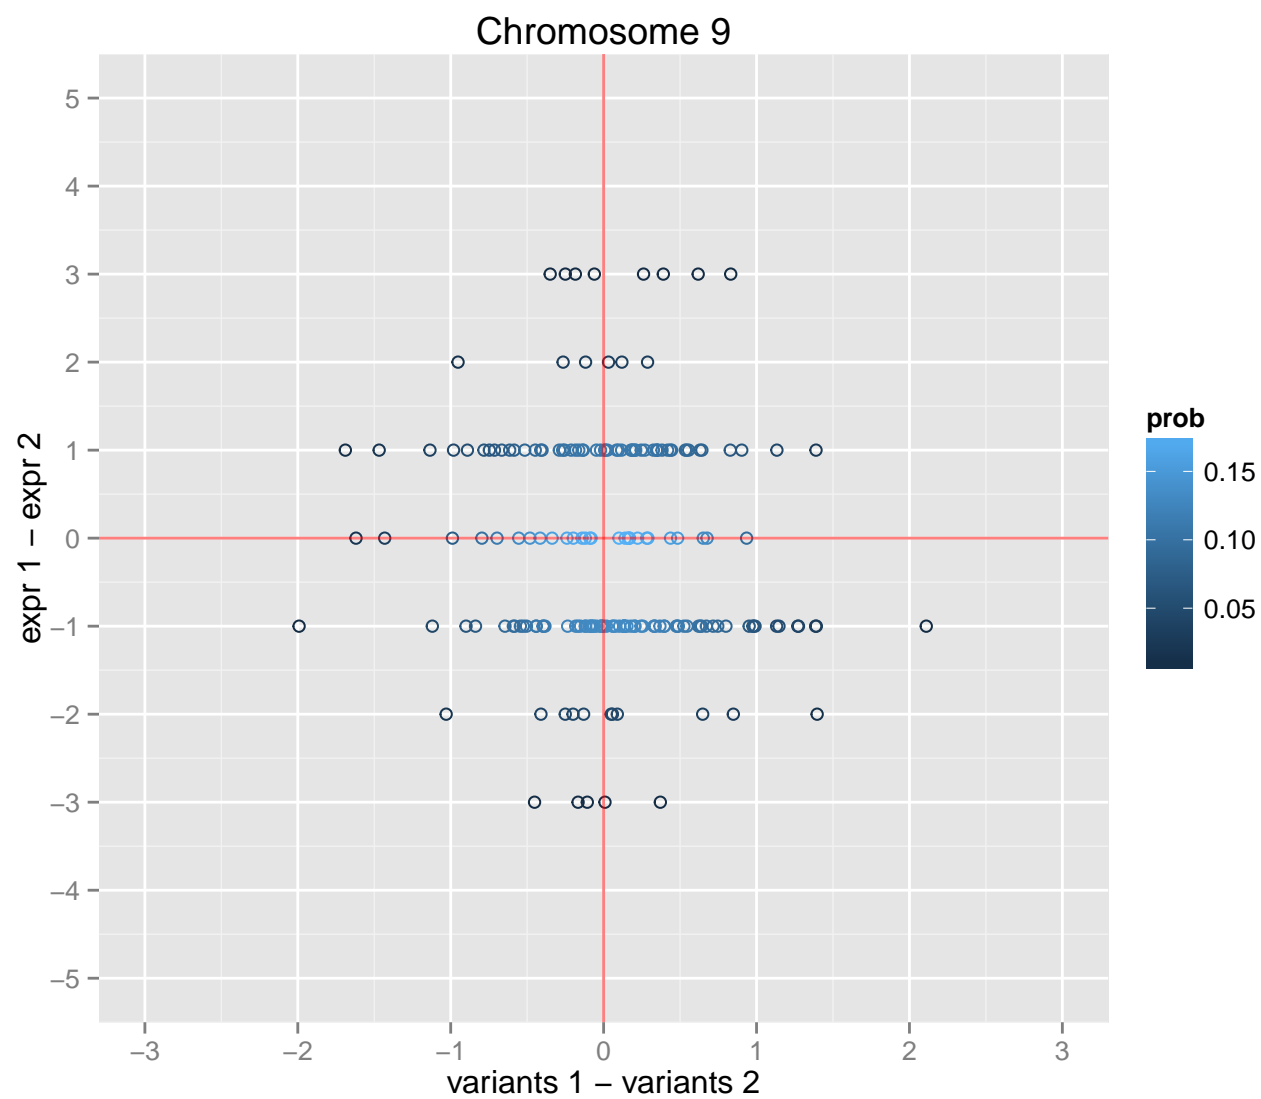

```
## data frame with 0 columns and 0 rows
```

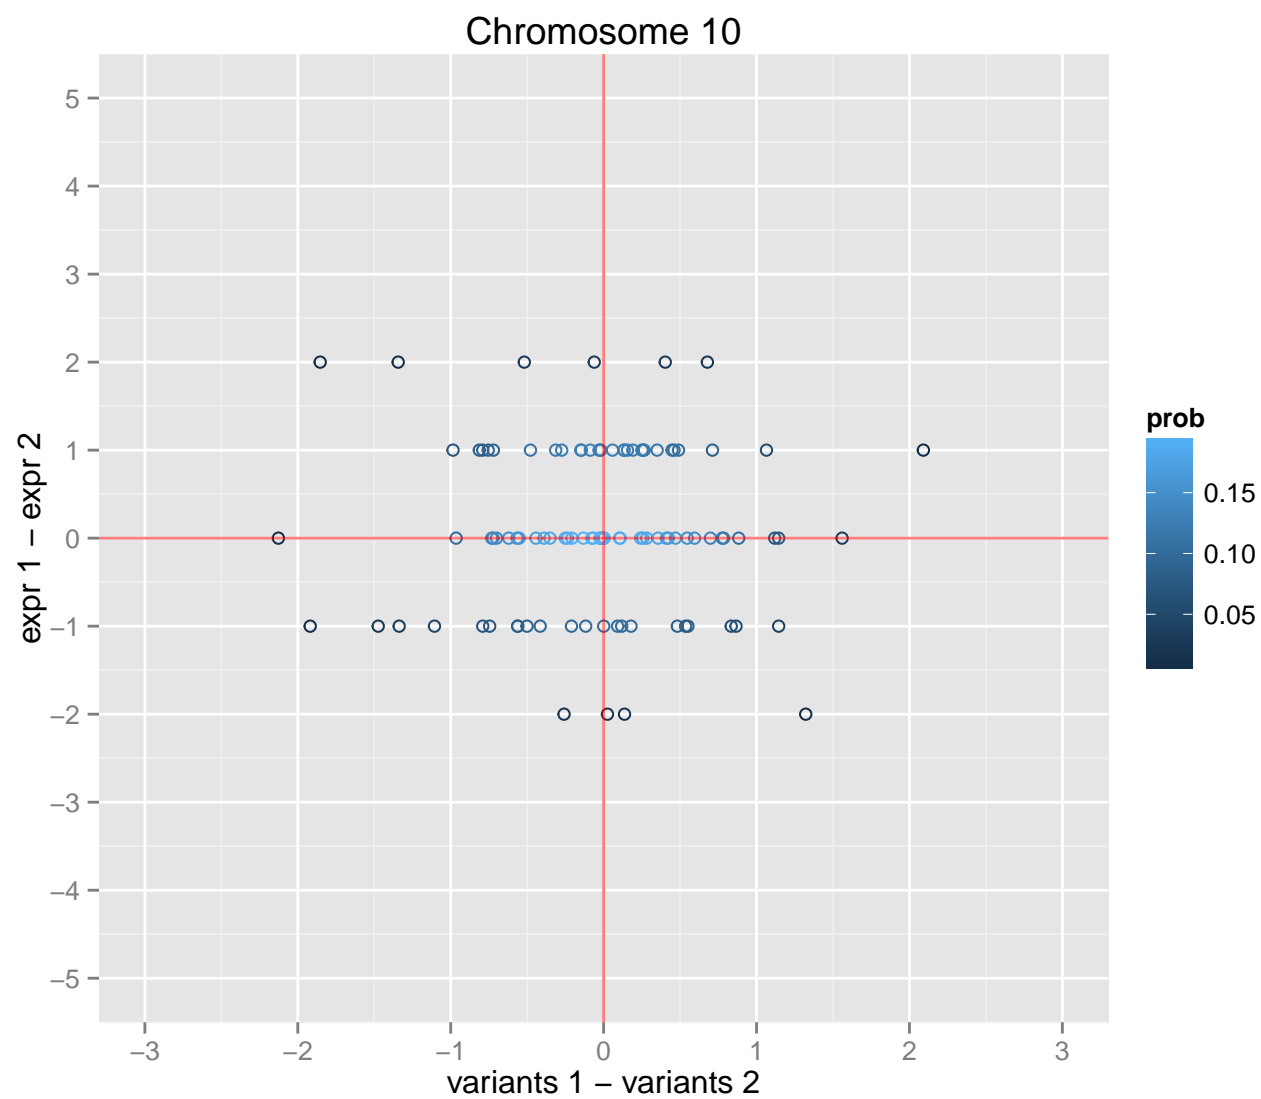

```
## data frame with 0 columns and 0 rows
```

```
## data frame with 0 columns and 0 rows
```

```
## data frame with 0 columns and 0 rows
```

```
## data frame with 0 columns and 0 rows
```
